Replication status testing on current MongoDB server

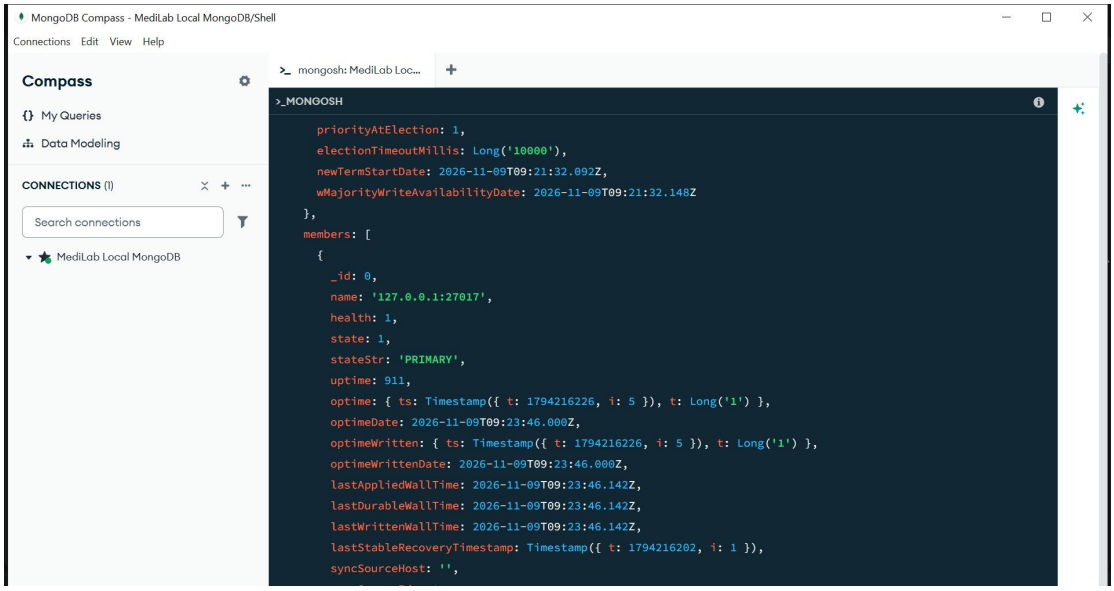

Replica setting evidence in MongoDB configuration setting

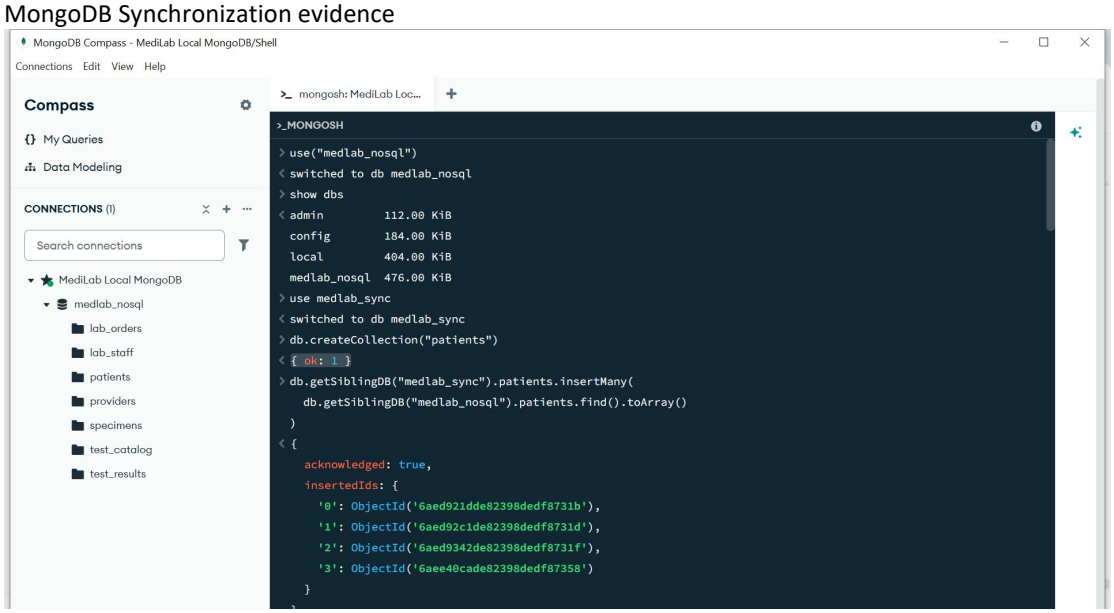

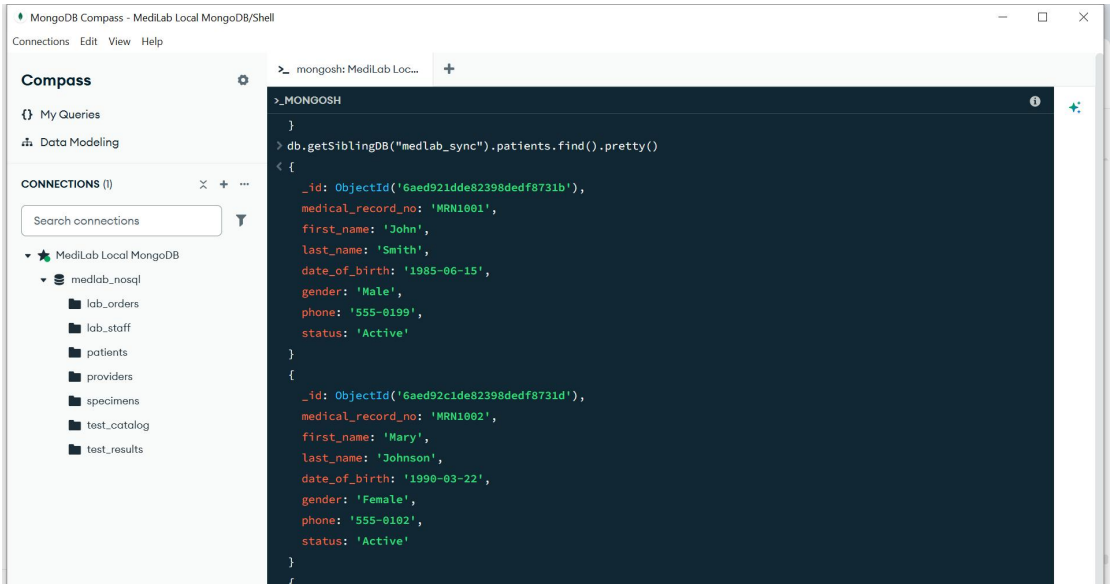

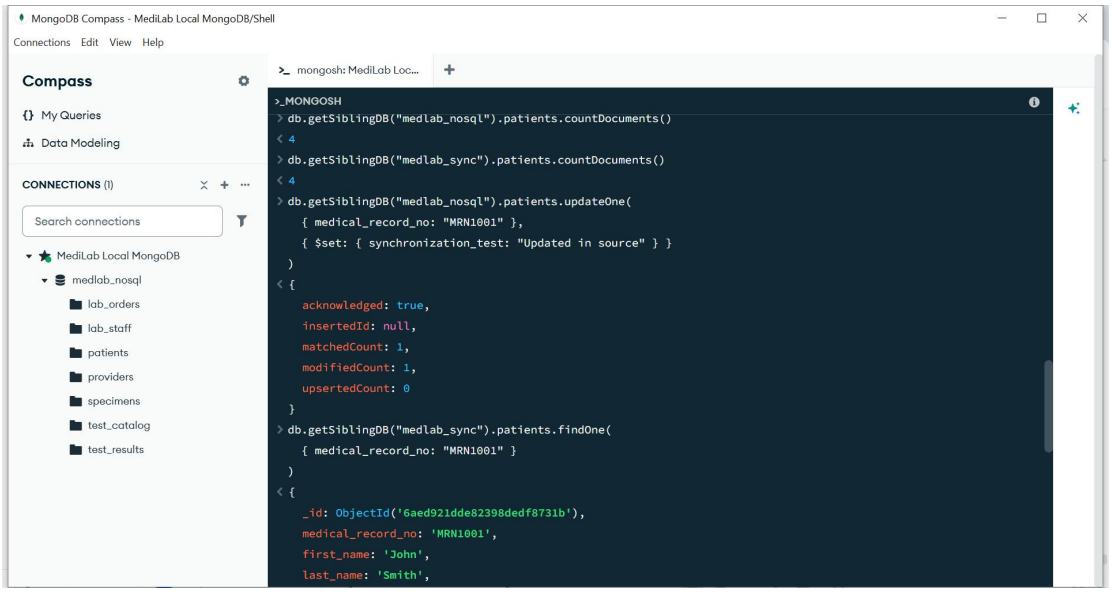

mongodb-replica-set-primary

MongoDB Synchronization evidence

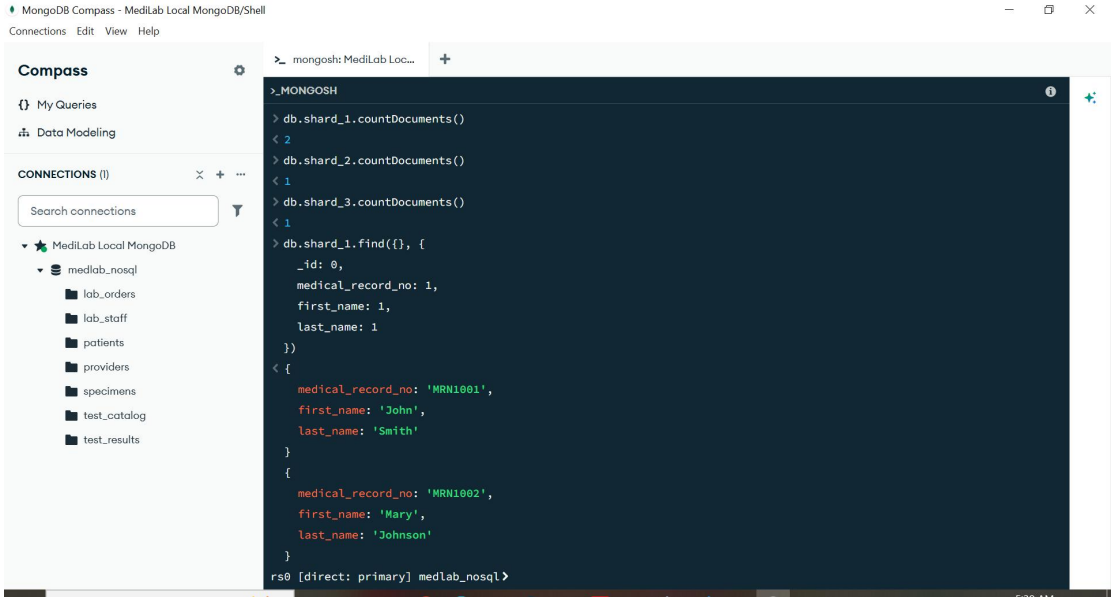

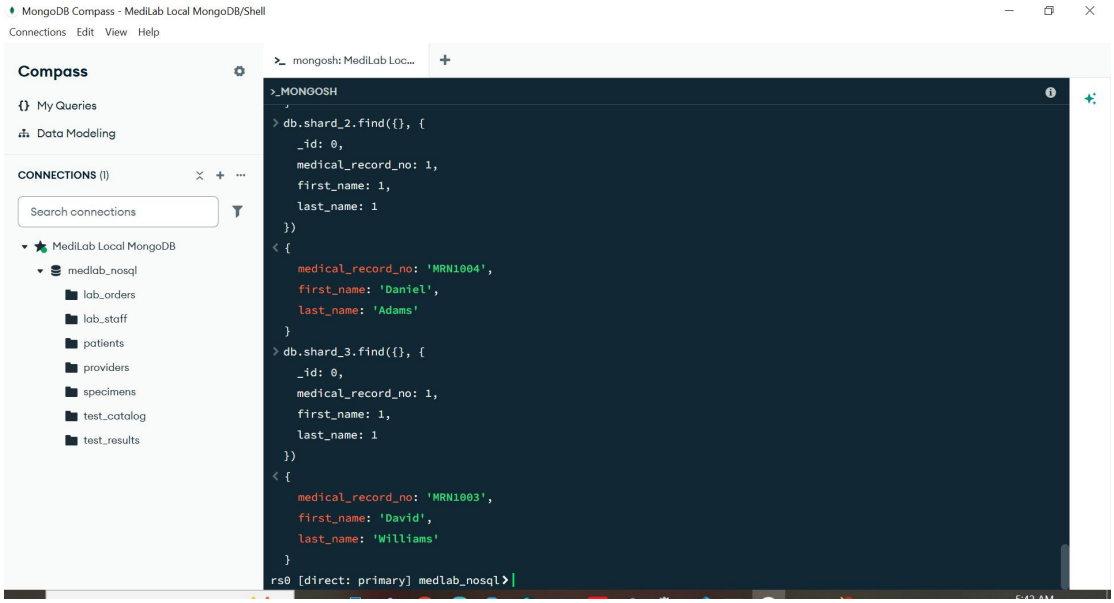

MongoDB Sharding

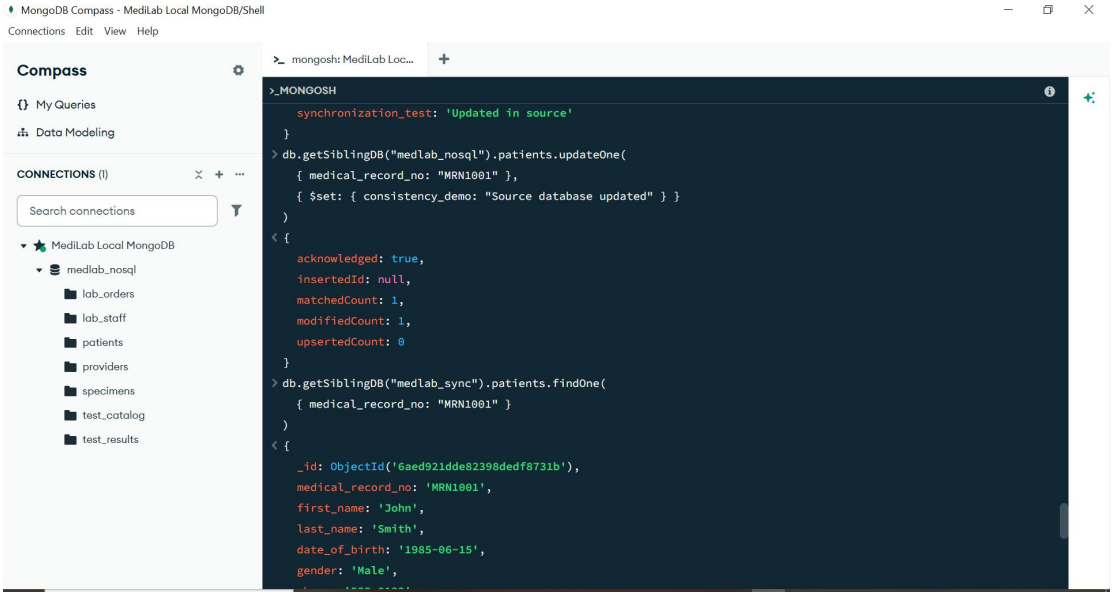

```
> use medlab_nosql
< already on db medlab_nosql
> db.createCollection("shard_1")
< { ok: 1 }
> db.createCollection("shard_2")
< { ok: 1 }
> db.createCollection("shard_3")
< { ok: 1 }
> db.shard_1.insertMany(
    db.patients.find({
      medical_record_no: { $in: ["MRN1001", "MRN1002"] }
    }).toArray()
  )
< {
    acknowledged: true,
    insertedIds: {
      '0': ObjectId('6aed921dde82398dedf8731b'),
      '1': ObjectId('6aed92c1de82398dedf8731d')
    }
  }
```

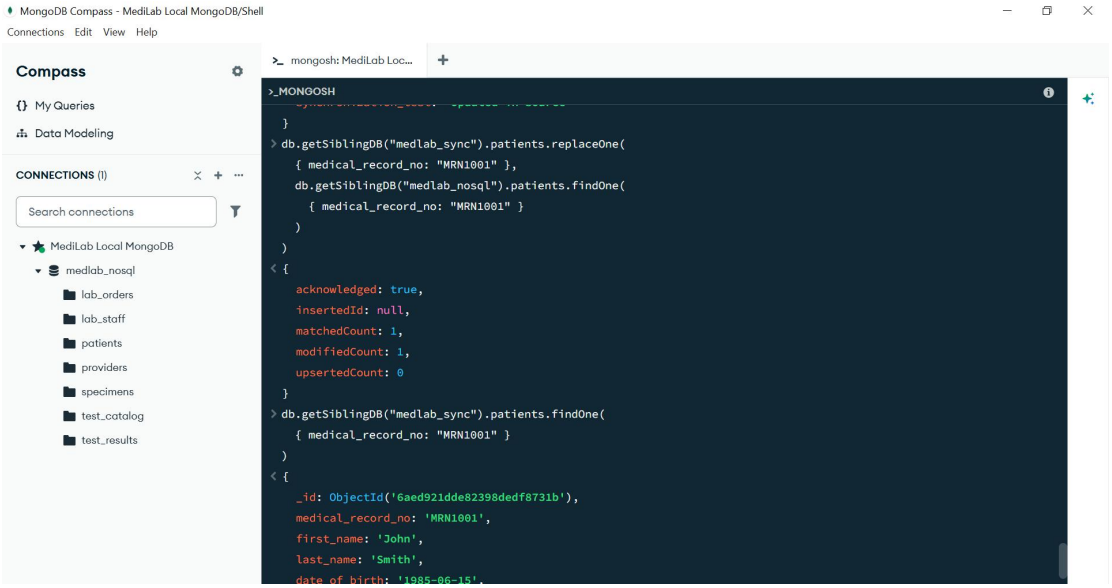

Confirming the actual numbers on each Shard created

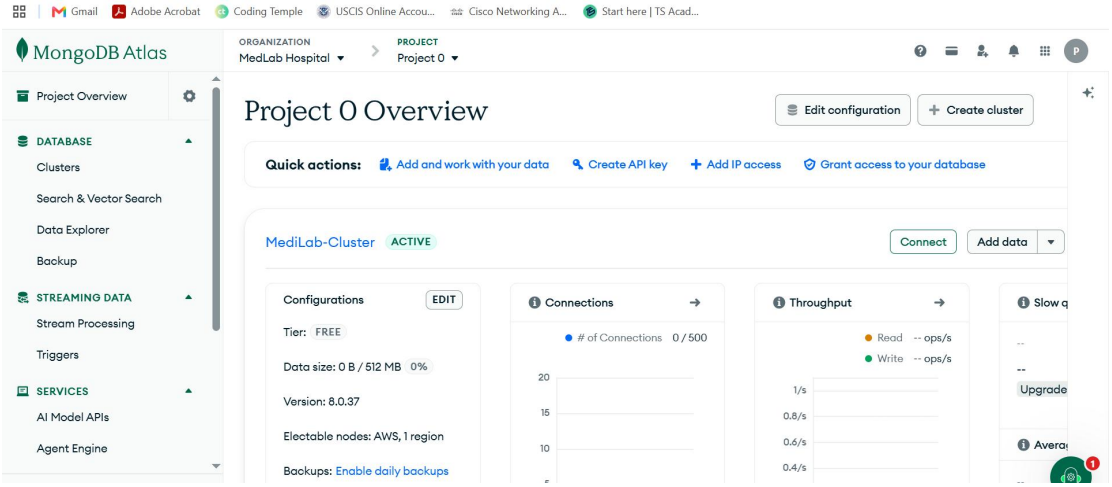

MongoDB data consistency and availability

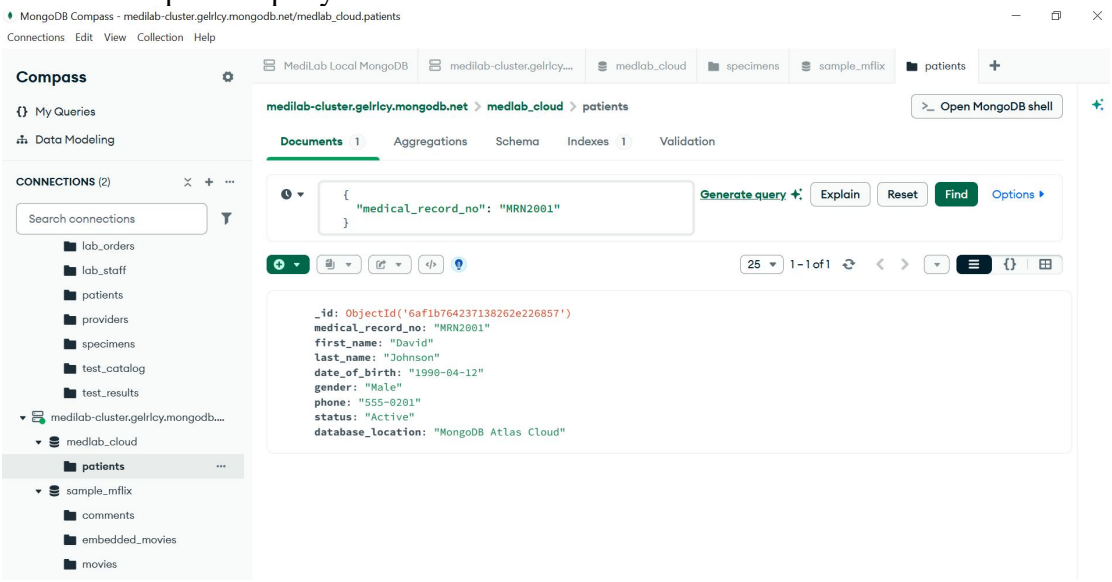

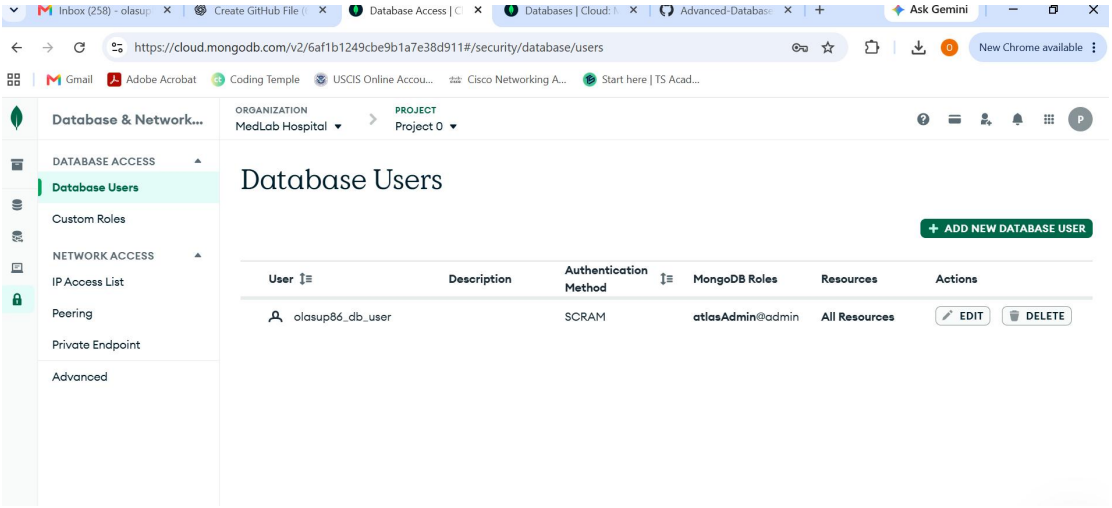

Cloud Integration using MongoDB Atlas

atlas-cloud-patient-query

Atlas hotname

atlas-mongosh-successful-connection and patient query
